## TENDANCES +

Exclusive to **LAURIER ARCHITECTURAL**, the TENDANCES line is the new alternative for coloring glass. Particularly suitable for interior decorating, this process consists of a permanent full-color surface, free of any trace of lead, opaque and guaranteed against peeling.

Available in 10 standard colors, the Tendances line can also be produced in most Benjamin Moore, Sico, Sherwin Williams or RAL range of colors using a computerized color matching system.

Tendances can be applied to products that have already been shaped, whether tempered or not.

## APPLICATIONS

For interior use only

- Wall cladding
- Glass partition
- Furniture
- Elevator cabin
- Backsplash
- Countertop
- Writable glass board

## STANDARDS

### Glasses

All glass used in our manufacturing process meets the following standards:

ASTM C1036-16 Standard  
specification for flat glass

CAN/CGSB 12.3 M91 (R2017)  
Flat, Clear Float glass
